

GOVARDHAN MANDAL

Artificial Intelligence Engineer | Data Science & Machine Learning

Chh. Sambhaji Nagar, Maharashtra, India | g.s.mandal433@gmail.com | +91 8767926207 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Final-year Artificial Intelligence engineering student with hands-on internship experience at GAO Tek Inc. spanning AI Content Writing, Lead Generation, and Technical Support, alongside academic experience building machine learning models and full-stack analytics applications. Skilled at turning large, messy datasets into measurable outcomes, with a track record of improving model accuracy, data quality, and system performance.

TECHNICAL SKILLS

Languages:	Python, SQL, HTML, CSS, C++
AI / ML / Data Science:	Scikit-learn, Pandas, NumPy, Statistical Modeling, Feature Engineering, Cross-Validation, Ensemble Methods, Prompt Engineering, Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Matplotlib, Seaborn and DSA
Web / Frameworks:	Django
Tools & Platforms:	Apollo.io, Docker, Power BI, Excel, Google Sheets, Microsoft Office, ChatGPT
Databases:	PostgreSQL, Database Schema Design & Normalization

EXPERIENCE

Multi-Role AI Intern, GAO Tek Inc.

Mar 2026 – Jul 2026

Remote

- Generated AI-assisted technical and marketing content, and mined/qualified 100+ leads per week using Apollo.io and Excel, supporting content and business development goals.
- Provided technical support and cross-team collaboration across Content Writing, Lead Generation, and Technical Support, applying prompt engineering and data analysis to improve workflow efficiency and reporting.
-

AI & Full-Stack Project Lead, Academic & Personal Projects

Oct 2024 – Dec 2025

India

- Directed full-stack ML and analytics solutions across datasets exceeding 50,000 records, optimizing algorithms via cross-validation and feature engineering to achieve 85%+ accuracy.
- Engineered preprocessing pipelines and normalized database schemas, cutting redundancy by 40% and improving data quality by 95%, then deployed full-stack platforms (Django, HTML/CSS) for 50+ concurrent users with real-time ML inference.

PROJECT HIGHLIGHTS

Student Placement Prediction System

- Developed a predictive model achieving 88.37% accuracy using ensemble techniques and stacking classifiers, validated via 5-fold cross-validation to improve stability and reduce overfitting.
- Deployed the trained model into a Django production environment with a standardized preprocessing pipeline, enabling consistent real-time predictions through a user interface.

EDA & Data Visualization Dashboard

- Processed 50,000+ records using Python and Pandas, then built an interactive Power BI dashboard with 15+ visualizations, improving decision-making speed by 3x.
- Automated the data cleaning pipeline, improving data quality by 95% and processing efficiency by 70%, with documented reproducible workflows for team knowledge transfer.

MNIST Digit Classification – Neural Network Architecture Comparison

- Built and benchmarked Perceptron, ANN, and CNN models in TensorFlow/Keras on MNIST, raising test accuracy from 91.55% to 99.29% through progressive architecture complexity.
- Engineered preprocessing (pixel normalization, one-hot encoding) and Pandas/Seaborn comparison visualizations to evaluate model performance trade-offs.

Diabetes Prediction System (Django + Docker + Keras)

- Built and containerized a Keras/TensorFlow ANN web app in Django to predict diabetes risk from 8 clinical features, deployed via Docker for consistent, portable delivery.
- Replaced a fragile pickled scaler with direct mean/std mathematical scaling in the application layer, eliminating cross-environment unpickling errors.

EDUCATION

Bachelor of Engineering, Artificial Intelligence

Expected Jan 2027

G.H. Rasoni College of Engineering (GHRCE), Jalgaon, Maharashtra

- Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management, Python Programming, Statistical Analysis

CERTIFICATIONS

GAO Tek Inc. — Internship, Lead Generation, Technical Support & Content Writing Certificates (2026) | Power BI Certificate — GAO Tek Inc. (2026) | Deloitte Data Analytics Job Simulation (2026) | LinkedIn Learning — Python Data Analysis, CS Principles (2025)
