

GOVARDHAN MANDAL

Chh. Sambhaji Nagar, Maharashtra India
g.s.mandal433@gmail.com / +91 8767926207

PROFESSIONAL SUMMARY

Analytical and results-oriented Data Science student with proven experience delivering machine learning solutions, data-driven insights, and scalable web applications. Demonstrates leadership in project execution, data interpretation, and cross-functional problem solving. Adept at translating complex datasets into measurable business outcomes through structured analysis and technical implementation.

TECHNICAL SKILLS

- Data Analysis
- Critical Thinking
- Data Visualization
- Machine Learning
- Web Development
- Statistical Modeling
- Leadership Mindset
- Python Programming
- Database Management
- Strategic Problem Solving
- Executive Decision Making
- Stakeholder Communication

EXPERIENCE

Data Science Project Lead / Academic & Personal Projects - India

01/2024 - Current

- Directed end-to-end development of machine learning and analytics solutions, managing datasets exceeding 50,000 records while improving model accuracy, system efficiency, and overall project delivery timelines by measurable margins.
- Led evaluation of multiple machine learning algorithms, optimizing predictive performance through structured experimentation, cross-validation techniques, and feature engineering, achieving accuracy improvements exceeding 85% across classification models.
- Designed scalable data preprocessing pipelines, improving data quality by 95% and reducing processing time by 70%, ensuring consistent and reliable inputs across training and deployment environments.
- Collaborated across development and analytics workflows to deliver production-ready applications, integrating models into web platforms and enabling real-time decision-making capabilities for end users.

Full Stack Developer (Project-Based) / Self-Initiated Applications - India

01/2023 - Current

- Built and deployed full-stack web applications handling over 1,000 records, ensuring zero data loss while improving database efficiency and application performance through optimized backend architecture and structured query design.
- Implemented secure authentication and authorization mechanisms supporting 50+ concurrent users, strengthening data protection and enhancing user experience through reliable and scalable system design.
- Engineered normalized database schemas reducing redundancy by 40% and improving query execution speed by 60%, enabling faster data retrieval and enhanced system responsiveness.
- Delivered user-focused solutions by integrating backend logic with intuitive interfaces, increasing usability, improving workflow efficiency, and supporting consistent application performance under varying workloads.

EDUCATION

Bachelor of Engineering: Artificial Intelligence
G.H. Rasoni College of Engineering (GHRCE) - Jalgaon, Maharashtra

Expected in 01/2027

- Expected Graduation: 2027
- Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management, Python Programming, Statistical Analysis

CERTIFICATIONS

Python Data Analysis — LinkedIn Learning (2026)

Computer Science Principles — LinkedIn Learning (2026)

PROJECT HIGHLIGHTS

Student Placement Prediction System

- Developed predictive model achieving **88.37% accuracy** using ensemble techniques and stacking classifiers across multiple algorithms.
- Conducted **5-fold cross-validation**, improving model stability and reducing overfitting risks across datasets.
- Integrated trained model into production environment using Django, enabling real-time predictions via user interface.
- Standardized preprocessing pipeline ensuring consistent inference performance across deployment scenarios.

EDA & DATA VISUALIZATION DASHBOARD

- Processed **50,000+ records**, identifying actionable trends and improving decision-making speed by **3x**.
- Built interactive dashboard with **15+ visualizations**, enabling deeper insights into data behavior.
- Automated data cleaning pipeline improving quality by **95%** and efficiency by **70%**.
- Documented reproducible workflows supporting scalability and knowledge transfer.
